Languages

- English (Fluent)
- French (Fluent)
- Spanish (basics)

Software skills

- Microsoft office:** Word, Excel, PowerPoint, Teams, Outlook
- Statistical software:** Eviews, R, Stata, SAS (basics)
- Programming software:** Python, Matlab, GAMS

EDUCATION

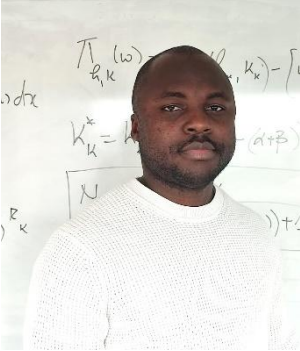

- PhD Economics, CY Cergy Paris Université, Cergy, France (Expected graduation in June 2025)
- MSc Economic Analysis, ESSEC Business school & CY Cergy Paris Université, Cergy, France (2020)
- MSc Applied Mathematics, University of Douala, Cameroon (2018)
- BSc Mathematics and Economics, University of Douala, Cameroon (2015)

PROFESSIONAL CERTIFICATIONS

- Certificate in Computable General Equilibrium (CGE), CGEmod, UK (ongoing)
- Certificate in Machine Learning And Data Science For Economists, National Association of Business Economists, USA (June 2024)
- Certificate in Time-Series Analysis And Forecasting, National Association of Business Economists, USA (August) 2024
- Certificate in Applied Econometrics, National Association of Business Economists, USA (May 2024)
- Python Programming for everybody, University of Michigan, USA (April 2024)
- Python Data Structure, University of Michigan, USA (April 2024)
- University Diploma in Applied Statistics, University Toulouse 1 Capitole, Toulouse, France (2019)

PROFESSIONAL EXPERIENCE

- Teaching Assistant, Probability and Mathematics for undergraduate students, CY Cergy Paris Université, Cergy, France (Since September 2024)
- Teaching Assistant, Macroeconomics for undergraduate students, CY Cergy Paris Université, Cergy, France (Since October 2020)
- Data Clerk, Codash Caritas Cameroon, Douala, Cameroon (April 2019 – September 2019)
- Mathematics Lecturer for Higher National Diploma students, Institut Supérieur des Professeurs Réunis, Douala, Cameroon (Sept 2018 – June 2019)

WORKING PAPERS

- ▮ Origin Vs Destination commodity Taxation with Heterogeneous Agents (submit)
- ▮ Optimal Taxation, Monopolistic Competition and Trade (First chapter of my doctoral dissertation)
- ▮ Origin or Destination Commodity Taxation In The Presence International Skill Labour Mobility (In process of been finalized)

PROFILE

Currently completing my PhD in public economics at the CY Cergy Paris University in Cergy-Pontoise (France), I am working on indirect taxation, and more generally on the effects of public policies on companies' profits and consumers' satisfaction. At the same time I started a certification in the resolution of computable general equilibrium models (CGE) with a focus on the use of GAMS software. This certification will enable me (as I will be completing it in December), among other things, to understand the calibration of the behavioral relationships in CGE models and formulate appropriate CGE policy experiments.

The economic policy skills I have developed in my PhD program are coupled to solid numerical and visualization skills steaming from my mathematical studies and software trainings. These hybrid and complementary training give me a quite complete economist and quantitative analyst profile, enabling me to identify the relationships between various economic factors, establish the links between them and measure their strength, assess determinants, evaluate and display results, and use my strong knowledge of economic theory to formulate solutions and strategy. I am working to further develop my practical abilities through certificates I am gaining at the United-States based National Association for Business Economics (NABE), with the prestigious designation of Certified Business Economist (CBE) in view.

Nicolas DJOB

Economist, PhD in progress, CBE candidate, CGE modellers (In training)

PROFILE (continued)

In a professional environment, I will be able to provide you with the following skills:

- || **Analytical thinking** gained from my numerical and rigorous theoretical training with one of the best public policy expert in France.
- || **Precise and concise communication:** whether in Cameroon or in France, my students appreciate the clarity of my lectures. Besides, I have presented several papers at doctoral seminars in France and Austria in front of a skeptical audience and these presentations were rather well received.
- || **Managerial abilities:** I had to occupy positions of responsibility in my extra-academic experiences, ending as the national president of a +1,000 students' association in Cameroon, active in more than 20 cities. During my 2-year tenure as national president, I organized a fund-raising campaign, the proceed of which I used to build a multi-function office for the association, which is still functional in Douala. These responsibilities taught me to keep a team motivated toward the achievement of a goal. During these times, I have training in one-day seminars three times on project management. I learned and practiced the following steps: understand the need, analyze the existing situation, define the actions to be carried out, the means to achieve them and the performance indicators, monitor and evaluate.
- || **Hard work and resilience:** Having grown up in a very modest environment and having lost my parents before entering college, pursuing my studies very quickly proved to be a great challenge. I was able to rise to the challenge, and today I'm finishing an otherwise demanding course of study.

I am therefore now eager to work in advisory role in advisory and/or strategy firms, rating agencies, banks, patronal organisations and other professional entities, central banks, etc. to help assess public policies and their impact on performances. I am also able to solve other complex economic issues such as the determination of tariffs, the calculation of optimal prices or costs, the construction and/or evaluation of economic models, etc...
